

INVACARE®

AVIVA™ FX POWER WHEELCHAIR

Yes, you can.

Design. Technology. Performance.

The new benchmark in front-wheel drive

Our new AVIVA FX Power Wheelchair has been designed to offer an impressive blend of new technologies and elegant design, for maximum comfort and control when driving both indoors and outdoors.

It was developed with the customer experience in mind and brings new features to enhance the user, provider and clinician experience. The **AVIVA FX** Power Wheelchair is an innovative leap forward in front-wheel drive power wheelchairs.

3

KEY FEATURES

◀ Design

- ▶ Clean lines, sleek angles and a quality finish really sets the **AVIVA FX** Power Wheelchair apart from the rest
- ▶ Allows personalization to the seating system, base and controls
- ▶ Seat-to-floor height can go as low as 16.75"
- ▶ Ideal for getting around at home or turning around that tight corner with a small turning radius
- ▶ Get up close to tables and into Wheelchair Accessible Vehicles
- ▶ Powerful climbing capability, even at slow speeds

Technology ▶

- ▶ New LED lighting system allows users to light up the night
- ▶ **REM400** touchscreen control requires minimal force to operate
- ▶ Revolutionary programming is designed to allow wireless access to diagnose and update the control system
- ▶ **LiNX® Technology** interface is designed to make it easy to configure individual settings via PC, Windows tablet or iOS device
- ▶ Adaptive Load Compensation interprets, learns and adapts the motors to changes and helps ensure the drive of the power wheelchair is optimized and well balanced over time
- ▶ **Invacare® G-Trac® Technology** is designed to make sure the driver stays on their intended path

◀ Performance

- ▶ Invacare® 4Sure™ Suspension System is designed to isolate the seat against vibrations and shocks and to keep seat angle virtually flat when traversing obstacles
- ▶ All four wheels consistently remain in contact with the ground, providing optimum weight distribution and traction
- ▶ Guarantees a smooth and virtually silent driving experience for the user
- ▶ Easy to service thanks to the quick access to the motors, gearboxes, shrouds, tires, wheels and hubs. Electronics placed at the rear of the unit with all wiring/connections clearly visible, while the batteries can easily slide out of the rear or front

AVIVA FX

Power Wheelchair at a glance

Combine advanced clinical features with a stable, soft ride and sleek looks, and you get the AVIVA FX Power Wheelchair. Unbeatable.

1 Ultra Low Maxx Power Positioning System

Designed to help provide both perfect posture and superb levels of comfort for the user.

- ▶ Helps ensure the head, shoulders, hips and feet never lose contact with the chair
- ▶ Customizable seating system that adapts to the body
- ▶ Designed to significantly reduce the risk of shear
- ▶ Varying width and depth options
- ▶ Combines up to 50° of tilt and 170° of recline for a tailored individual position
- ▶ Selection of backrest, headrest and armrest options
- ▶ Built-in rail for mounting positioning accessories

2 Allows users to personalize their wheelchair

- ▶ Selection of six modern color options for shroud and hub inserts allows the user to design the wheelchair around their personality

3 Low seat-to-floor height

- ▶ As low as 16.75" with Ultra Low Maxx Power Positioning
- ▶ For improved stability and user access, even with a 14" drive wheel and powerful Group 24 Battery

4 Caster size

- ▶ 8" size great for indoor/outdoor use, and maneuvering in tighter spaces

8

Invacare G-Trac Technology

- ▶ Patented digital gyroscopic technology comes standard on the **AVIVA FX** Power Wheelchair. It is designed to detect and correct even the smallest deviation from the user's intended path, so they'll go exactly where they want to go without having to tweak the control, even at higher speeds

7

Invacare 4Sure Suspension

- ▶ The advanced 4Sure Suspension System includes active articulating front anti-tippers with elastomer dampeners, large rear caster arms, and true shock absorbers all working together so the ride remains soft and stable even when climbing obstacles and traversing over rough terrain

6

DuraWatt™ Motor

- ▶ Quiet, sealed 4-pole motors are designed to resist water ingress and feature internal brushes for reliability and performance

5

LED Lighting

- ▶ Light package available for front and rear lights

AVIVA FX

Power Wheelchair controls

LiNX Technology is our insight inspired control system is designed to provide a superb driving experience for users and enables programming and maintenance updates to be made wirelessly and in real time.

Touchscreen technology

The REM400 remote has an impressive 3.5" color touchscreen that requires minimal force to operate. Also included on the large screen is a speedometer and an odometer.

Built-in Bluetooth®

The REM400 remote allows users to be connected to multiple devices simultaneously and has built in mouse mover and switch control functionality, to be able to control smart speakers, phones and laptops.

Display only version

The REM500 is a display only version of the REM400, retaining the 3.5" interactive touch screen, and allows specialty controls to be used to operate the powerchair wheelchairs.

LiNX Remotes

These five remotes have the same familiar design and share the same key features:

- ▶ Ergonomic joystick requiring a low force to operate
- ▶ Intuitive operation through illuminating icons
- ▶ Easy to use physical speed dial

REM110

Specialty controls

AVIVA FX Power Wheelchairs are pre-loaded with head array driving profiles that support ASL specialty controls. Thanks to LiNX/ASL integration, adding head arrays, switches and other specialty controls is as easy as ever.

Feature

- ▶ Extremity control joystick
- ▶ Molecule Ultra-Light Touch Joystick*
- ▶ Compact remote with LED display*
- ▶ Pediatric compact joystick
- ▶ Sip 'n' puff head array with lip switch*
- ▶ ATOM/PROTON head array*
- ▶ Attendant control unit

Benefit

- Small joystick ideal for chin control, and comes with a headrest and egg switch
- Ideal if you have muscle weakness or fine motor control. It needs very little force
- Perfect if you have a limited range of motion and/or reduced strength
- Its shallow base makes it a good option for a midline mount
- It uses simple sip and puff controls with head movements
- There are three proximity sensors mounted in the headrest with built-in Bluetooth
- It lets your caregivers use some of the chair functions

*Available off-chair only
